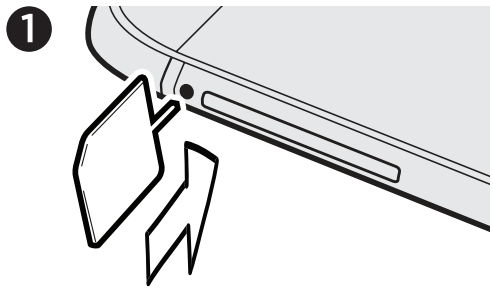
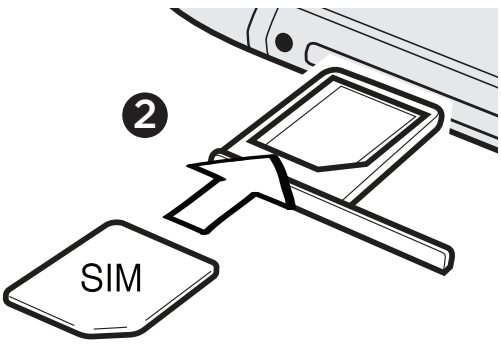
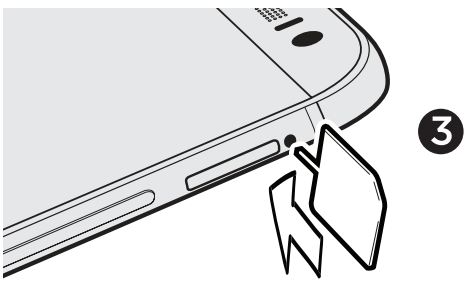
HTC One M8s

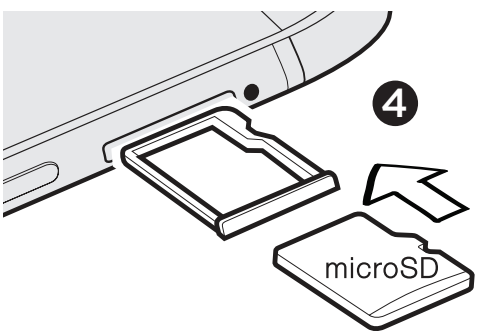
Inserting your nano SIM and storage cards

IMPORTANT: USE A STANDARD NANO SIM ONLY.
Don't cut a micro SIM or regular SIM card and insert it into the nano SIM slot. It's thicker than the standard nano SIM card and may get stuck in the slot.









1. Insert the tip of the tray eject tool (or a small bent paperclip) into the hole next to the nano SIM card tray that's on the left side of the phone.

   Push the tip all the way into the hole until the tray ejects, and then pull the tray out.

2. Place the nano SIM card (contacts facing down) into the tray, and then insert the tray back into the slot.

3. Use the same tray eject tool to eject the microSD™ card tray that's on the right side of the phone. Pull the tray out.

4. Place the microSD card (contacts facing down) into the tray, and then insert the tray back into the slot.

Want some guidance on using your phone?

On your phone, check out our friendly walkthroughs in the **Tips & Help** app. For self-help in troubleshooting basic problems, you can use the **HTC Guide** app. Or go to **www.htc.com/support/** to find tutorials, the user guide, FAQs, latest news, and more.

Please also read the Safety and regulatory guide that's included in the box.
